# Ty v top-1%, kogda --

Povedencheskie markery, a ne sertifikaty. Zamechaesh v razgovore, ne v teste.

## // BEGOST

### Dumayesh na angliyskom, ne perevodish

Vnutrenniy monolog perelyuchaetsya na angliiskiy. Pri chtenii znachenije poyavlyaetsya srazu.

## // TOCHNOST

### Slyshish oshibki u drugikh (i u sebya v zapisyakh)

Kogda nositel govori nepr. -- zamechaesh. Zapis mesyachnoy davnosti -- slyshish chto kazalos normalnym.

## // VKUS

### Vybiraesh slovo po nyansu, ne pervoe popavsheyeya

Mezhdu big/large/vast/enormous -- vybiraesh osoznanno. Chuvstvuesh kogda "however" tyazhelo.

## // STRESS

### Neznakomaya tema vklyuchayet inference, ne paniku

"I am not sure about the term, but what I mean is..." -- eto C1-otvet, ne proval.

## // SISTEMA

### 35 minut v den ne oschuschayutsya kak uchyoba

Podkast vo vremya edy, statya vmesto lenty. Yazyk vstroen v potok -- ne intensivnost, a ustoychivost.

## // AI-TOOL

### Ispolzuesh AI kak zerkalo, a ne perevodchik

Davno ne prosish "perevedi". Prosish "otsenyi ubeditelnost", "naydy 3 tochnee". AI -- instrument samootsenki.

## Yazyk uchyat godami --

### nosit?lyami stanovyatsya za 52 nedeli privyчек.

Ne znanie delaet raznitsu -- to, chto ty delaesh kazhdyy den.
